

INTERNATIONAL ASSOCIATION OF METEOROLOGY AND ATMOSPHERIC SCIENCES (IAMAS)

of the International Union of Geodesy and Geophysics (IUGG)

Dear Commissions and Members at Large:

We seek nominations for the IAMAS as well as the IUGG Early Career Medal, to be awarded at the July 2019 Assembly in Montreal Canada. Below are the nomination procedures for the IAMAS Early Career Medal, which requires a brief (less than 2 page) account of the achievements of the nominated scientist, details of their involvement with IAMAS, a list of their major publications and an assessment of their potential.

Since the IUGG medal nomination is due on June 20, 2018, we ask that all nominations for the IAMAS medal be emailed to Joyce Penner before May 20, 2018. The Bureau will then select 1 person to put forward for the IUGG medal. Since the IUGG Medal Nomination requires 3 letters of support, we request 3 letters. The IAMAS Early Career Medal will be selected from the full list of nominations, in the event that the IUGG award is not given to our nominee.

Summary of items needed by May 20, 2018:

- A nomination letter (not to exceed 2 pages)
- 2 additional letters of support
- The nominee's CV (should not exceed 3 single-spaced pages) with an emphasis on his/her scientific work in a research field of IAMAS and his/her contribution to international scientific cooperation
- A list of the most important published scientific works (not to exceed 2 single-spaced pages)

Early career is defined as a scientist who has earned their highest degree (PhD or equivalent) within the last 10 years and is under 40 years of age when nominated and (for IUGG) actively promotes international scientific cooperation in Earth and space sciences.

Nominations may only be submitted by the Commission presidents and the Members at Large.

Submit all nomination packages before May 20, 2018 to:

Joyce Penner (penner@umich.edu)

Yours faithfully,

Joyce Penner, Vice-President, IAMAS

comprising the

International Commission on Atmospheric Chemistry and Global Pollution

International Commission on Atmospheric Electricity

International Commission on Climate

International Commission on Clouds and Precipitation

International Commission on Dynamical Meteorology

International Commission on the Middle Atmosphere

International Ozone Commission

International Commission on Planetary Atmospheres and their Evolution

International Commission on Polar Meteorology

International Radiation Commission
